

# Infor Enterprise Performance Accelerator Kit

## v9.5 Technical Requirements

*Infor EPAK is a collaborative content development platform that allows enterprises to drive user productivity and mitigate risk throughout all phases of the software ownership lifecycle. This document provides the minimum system requirements for various Infor EPAK components. Your organization might be implementing some or all of these components, so refer to the sections that are applicable to you.*

### Multi-user Install

The content authors who create training content use the Infor EPAK development tool. This section outlines the technical requirements for a multi-user installation. In a multi-user installation, the core Infor EPAK development tool files are installed on a central server for content sharing, and a client version of the Infor EPAK development tool is installed locally on the content author's workstation.

Server Requirements for a Multi-user Install	
Hardware	
Processor	1GHz or greater
System memory	1GB or greater
Physical storage	380MB for program files
Network connection	100Mb connection capable of communicating via HTTP(S) and TCP/IP
Software	
Operating system	Microsoft Windows 2003 Server 32-bit (SP1 or SP2 required), 2003 Server 64-bit (RTM, SP1, or SP2), or 2008 Server 32-bit or 64-bit
Internet server	Microsoft Internet Information Server 6.0 or 7.0
Software framework	Microsoft .NET Framework 2.0 or 3.0
Miscellaneous	Citrix environments supported
Database	
Database	Oracle Database v9.2, v10.1, v10.2 or v11.1 --OR-- Microsoft SQL Server 2005 (SP2 required) or SQL Server 2008
Physical storage	200MB for Oracle or 625MB for Microsoft SQL for initial installation; additional storage possibly required depending on amount of content created

## Client Requirements for a Multi-user Install

Hardware	
Processor	1GHz or greater
System memory	1GB or greater
Physical storage	980MB (380MB for program files; 600MB for locally stored content)
Network connection	Broadband (DSL or faster) connection capable of communicating via HTTP(S) and TCP/IP
Software	
Operating system	Microsoft Windows XP Professional 32-bit (SP2 or SP3 required) or 64-bit (SP2 or SP3 required), or Windows Vista 32-bit (RTM or SP1) or Vista 64-bit (RTM or SP1)
Browser	Microsoft Internet Explorer 6.0 (SP2 required) or 7.0
Software framework	Microsoft .NET Framework 2.0 or 3.0
Word processing software	Microsoft Word XP Pro (SP3 required), 2003 Pro (SP3 required), or 2007 (RTM or SP1) for document outputs (includes PDF format)
Other required applications	<ul style="list-style-type: none"> <li>• Microsoft Word 2007 or Word 2003 with compatibility pack is required to edit document styles</li> <li>• Adobe Acrobat 7.0 or 8.0 Standard or Professional is required to create PDF documents with Microsoft Word 2003 or earlier</li> <li>• Microsoft Windows Media Player 6.4, 7.1, 9, 10, or 11 is required for sound playback</li> <li>• HP Test Director 9.0 or 9.2 and HP Quality Center Microsoft Excel Add-on for Quality Center 9.0 or 9.2 are required to create HP Quality Center documents</li> <li>• Microsoft Excel 2007 or Excel 2003 with compatibility pack is also required to view and export EPAK-generated HP Quality Center documents into HP Quality Center. Excel is not required to generate the documents.</li> </ul>
Miscellaneous	Citrix environments supported
Database	
Database	Firebird embedded database version 2.0.0.12748, and Firebird .NET Data Provider v2.0.1

## Single User Install

The Infor EPAK development tool is installed for use by content authors who will be creating training content. This section outlines the system requirements for a single user installation. In a single user installation, the core Infor EPAK development tool files are installed locally on the content author's workstation.

### Technical Requirements for a Single User Install

Hardware	
Processor	1GHz or greater
System memory	1GB or greater
Physical storage	1.085GB of physical storage (485MB for program files; 600MB for content); additional physical storage possibly required depending the amount of content created
Software	
Operating system	Microsoft Windows XP Professional 32-bit (SP2 or SP3 required) or 64-bit (SP2 or SP3 required), or Windows Vista 32-bit (RTM or SP1) or Vista 64-bit (RTM or SP1)
Browser	Microsoft Internet Explorer 6.0 (SP2 required) or 7.0
Software framework	Microsoft .NET Framework 2.0 or 3.0
Word processing software	Microsoft Word XP Pro (SP3 required), 2003 Pro (SP3 required), or 2007 (RTM or SP1) for document outputs (includes PDF format)
Other required applications	<p>Microsoft Word 2007 or Word 2003 with compatibility pack is required to edit document styles</p> <p>Adobe Acrobat 7.0 or 8.0 Standard or Professional is required to create PDF documents with Microsoft Word 2003 or earlier</p> <p>Microsoft Windows Media Player 6.4, 7.1, 9, 10, or 11 is required for sound playback</p> <p>HP Test Director 9.0 or 9.2 and HP Quality Center Microsoft Excel Add-on for Quality Center 9.0 or 9.2 are required for HP Quality Center documents</p> <p>Microsoft Excel 2007 or Excel 2003 with compatibility pack is also required to view and export EPAK-generated HP Quality Center documents into HP Quality Center. Excel is not required to generate the documents.</p>
Database	
Database	Firebird embedded database version 2.0.0.12748, and Firebird .NET Data Provider v2.0.1

## Content Publication

This section discusses the system requirements for published output from Infor EPAK—that is, the content that end users will view and use. After recording Infor EPAK content using Infor EPAK developer tools, content authors will publish the content to one or more different published outputs. There are three types of published outputs discussed in this document: player, learning management system (LMS), and HTML Web site

### Server Requirements for Player, LMS Package, and HTML Web Site

Hardware	
Processor	1GHz or greater
System memory	1GB or greater
Physical storage	Between 500MB and 4GB of physical storage adequate for most implementations
Network connection	Network connection capable of communicating via HTTP(S) and TCP/IP
Software	
Operating system	Any
Web server	Any
LMS package	Compliant with AICC 3.5, SCORM 1.2, or SCORM 2004

### End-User Requirements for Player, LMS Package, and HTML Web Site

Browser	Operating System
Microsoft Internet Explorer 6.0 or 7.0	Microsoft Windows 2000 SP4, Windows XP Professional 32-bit (SP2 or SP3 required) or 64-bit (SP2 or SP3 required), or Windows Vista 32-bit (RTM or SP1) or Vista 64-bit (RTM or SP1)
Firefox 2.0 or 3.0	<ul style="list-style-type: none"> <li>• Microsoft Windows 2000 SP4, Windows XP Professional 32-bit (SP2 or SP3 required) or 64-bit (SP2 or SP3 required), or Windows Vista 32-bit (RTM or SP1) or Vista 64-bit (RTM or SP1)</li> <li>• Macintosh OS X 10.2.x or later</li> <li>• Modern Linux distribution</li> <li>• Note: Do It! mode is not supported with Firefox</li> </ul>
