## HTI Cybernetics Selects Infor ERP VISUAL Software to Replace EPICOR

### BizTech Will Provide Implementation Support

Sterling Heights, MI -April 4, 2011-HTI Cybernetics, a manufacturer of industrial machinery and equipment, has selected Infor ERP VISUAL manufacturing software to replace EPICOR and to improve their business processes. HTI will implement the VISUAL Project Manufacturing, Financials, Time & Attendance and Payroll modules. Microsoft SQL Server will be used as the database platform for VISUAL. The Infor ERP VISUAL Software was purchased through Business Technical Consulting, LLC (BizTech), an Infor Channel Partner in Toledo, OH. BizTech will provide the ERP implementation support.

Joe Keppler, Chief Financial Officer at HTI, stated that the lack of functionality and support availability were the key drivers for replacing their EPICOR ERP system. Infor ERP VISUAL was selected because of its capabilities to both capture Project Costs and integrate with Microsoft Project Server.

The Infor ERP VISUAL Implementation will kick off in May 2011, and HTI is scheduled to go-live in September 2011.
