## Miljoco Corporation Successfully Implements Infor ERP VISUAL

### BizTech Provides Implementation Support

Toledo, OH - April 16, 2010 - Miljoco Corporation and Business Technical Consulting, LLC (BizTech) have successfully completed an implementation of Infor ERP VISUAL manufacturing software at Miljoco's world headquarters in Warren, Michigan. With 35 people in its headquarters and manufacturing plant, 55 more at a plant in Shanghai, China - and with more than 1,500 customers around the world - Miljoco's management knew it needed an Enterprise Resource Planning (ERP) system to manage the increasing complexity and remain competitive in a market that stretched across the globe. After assessing vendor ERP packages and viewing demos, Miljoco's team unanimously chose Infor ERP VISUAL.

With assistance from BizTech, VISUAL was officially launched on February 1, 2010. "The success was driven by the commitment of Miljoco's Management Team", said Joe Zalewski, BizTech Managing Partner and COO, "Our respective teams worked in harmony throughout the project". At the end of the first month of using VISUAL, the results validated Miljoco's decision: while they had to chase down a few errors, everything tied together in the month-end reports. "The exceptions were small and routine, and have not repeated since fixing them," said Miljoco's President Howard Trerice.

Miljoco's next big goal is to realize full cost savings on the promise of reduced inventory through better materials sourcing and management. "Our original projections indicated that we could pay for the entire ERP implementation in reduced inventory alone," Trerice said. "It will take months to rationalize our existing inventory, but early results are promising."
